

International Classification of Diseases (ICD-10)

Epic Changes April 1

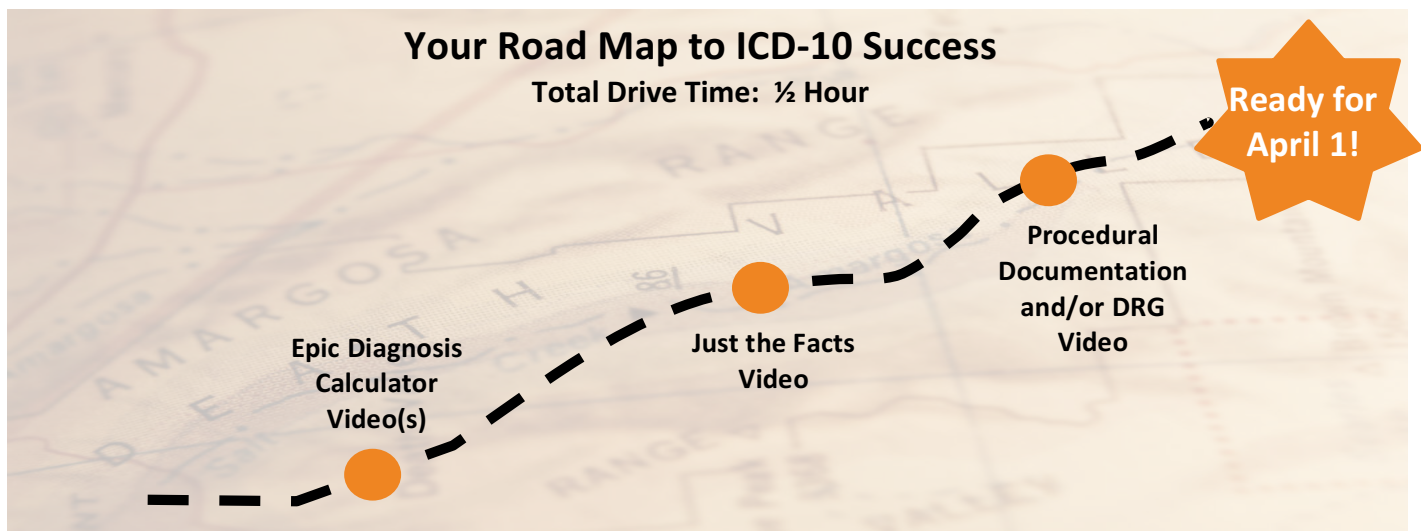

ICD-10 in Epic Is Happening!

- Beginning April 1 you will see the **new diagnosis calculator in Epic**.
- April 1 – October 1 is **your time to practice** documenting patient information to ICD-10 specificity.
- Your investment in **training now will reduce the time you spend later** reviewing feedback from CDS/Coders.

Reduce those Sticky Notes and InBox messages! Starting April 1, if your documentation is missing ICD-10 specificity, you will receive feedback from your facility clinical documentation specialists or professional billing coders.

Don't Be Caught Off Guard

- **Targeted online education** is available from work or home – many in easy to manage 10-15 minute modules
- Jump start your training with 3 short videos – in **about ½ hour total**, you'll have an overview of ICD-10 and be ready to try out the new Epic Diagnosis Calculator.

Critical Step: Watch the Diagnosis Calculator Video(s)

We strongly recommend all inpatient and outpatient providers watch the applicable Diagnosis Calculator video(s) on [the Commons](#).
